

**The new RBF02 bench from Leisure Vehicle Services  
With Independent side slide feature and runners  
allowing the seats to separate independantly for added space and comfort.**

The RBF02 is the latest addition to the LVS seating range. With 2 individual seats, the RBF02 offers passengers greater comfort than the standard flat foam options. The minimum width is 904mm, with the left hand (passenger side) seat having a side slide to increase the width to 1024mm. The side slide allows the passengers greater comfort whilst travelling. Both seats have runners (front to back) and adjustable backrests.

The open frame design means the base section can be utilised for additional storage, or installation of accessories such as water heaters etc.

The seats are available untrimmed, trimmed in standard black fabric or in a Ducato trim.

\* this height is for the double floor, lower variants available

The frame has been tested in vehicle for the Fiat Ducato/Peugeot Boxer/Citroen Relay 2007+, Mercedes Sprinter 2007-2018 and Mercedes Sprinter 2019+. For the Fiat Ducato the measurement from the floor to top of the seat squab is 648mm, designed to suit the Ducato double floor installation. Other heights are available, please contact LVS for further information.
